Making Community Led Sanitation work with Community Health Clubs

Presented by Dr. Juliet Waterkeyn CEO, Africa AHEAD

28th January, 2016 SuSanA Webinar

Objectives of the CHC Zimbabwe Programme: Blanket coverage of all households in aCHC

Higher CHC targets than ever before:

1. Community Led: Every house hold having a CHC member

2. Total Sanitation: all households having safe sanitation

Zero Open Defecation (ZOD) was adopted as the slogan. It means the same as ODF except it is easier to sing

ZOD means:

- Open defecation free (no faeces on the ground)
- Latrine to be properly covered toilet (Flies cannot enter) Or VIP with functional ventpipe (gauze to trap flies exit)

20 topics: one per session for six months with 'homework'

The Meeting Place constructed entirely by the community to ensure CHC meetings can be held in comfort.

A demonstration pot rack is constructed at every CHC Venue

The ZOD latrine at the CHC Meeting Place

Community designed

Community built

Community used

No external inputs

A demonstration Tippy Tap is built at all venues

All members have a least one Tippy tap at home

All members have a pot rack

All members have a rubbish pit

All members have a wash shelter

Model Home Competitions stimulate high standards

The Kitchen seen from the outside

Inside the kitchen

- Safe storage
- of kitchen utensils
- **Good food** • hygiene
- Safe Water Storage

Swept yards and no open defecation Fuel efficient stoves are encouraged to protect the environment

After only 4 months: Blanket coverage over 11 wards: More CHC members than households

Districts	Wards	Villages	h/holds	H/hs CHCs	CBFs	CHCs	Members	Committee	Ward Pop	CHC population
Gutu	5	192	8274	6640	70	214	7963	214	34339	27996
Mberen	6	237	7,981	7,221	84	240	9,366	240	46,525	40,164
Total	11	429	16,255	13,861	154	454	17,329	454	80,864	68,160

CURRENT DEBATE BETWEEN TWO MAIN APPROACHES

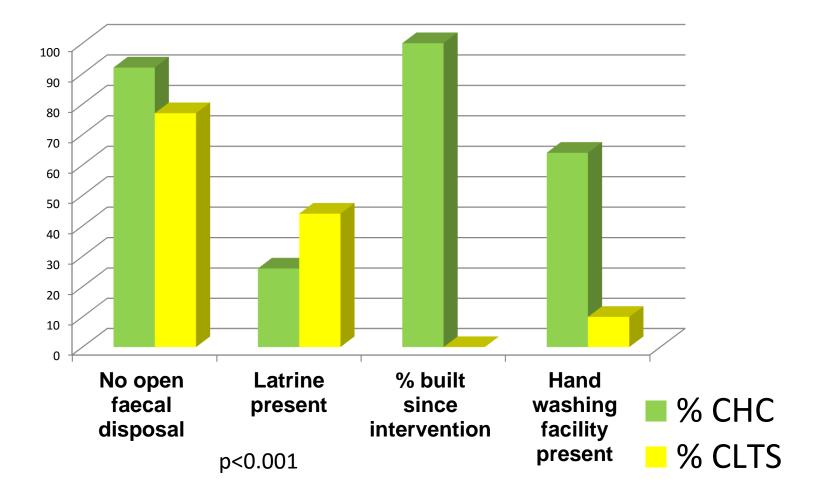

CHC Approach: Implementation strategy

- 6 months Hygiene sessions
 20 sessions (each week)
- Learning good practice through fun participatory activities reinforced by song, drama
- Informed group decision making and weekly homework
- Voluntary household improvements / support
- Zero Open Defecation (ZOD) & 20+ other hygiene improvements

CLTS Approach (ZimCATS) Implementation strategy

- One 'Triggering' day + a few follow-up visits
- Village walk to shock community that they are eating their own faeces
- Community shamed into action
- Leaders enforce change with fines / punishment
- Open Defecation Free (ODF) Village free ODF zone

Observed Indicators of Sanitation and Hygiene between CLTS and CHC villages in Zimbabwe
